IP Geolocation Checklist

LIR.SERVICES

Range _____ **Country** _____ **City** _____ **Date** _____

1. The registry

☐ **country** attribute on the inetnum and inet6num objects is correct

☐ Geofeed (optional): the file is published and the **geofeed:** attribute is added in the RIPE Database

2. Send each provider the range and the location you want

Provider	Where to send it	Sent (date)	Reply / ticket	Corrected (date)
MaxMind	maxmind.com/en/geoip-data-correction-request			
Google	support.google.com/websearch/workflow/9308722			
IP2Location	support@ip2location.com			
DB-IP	support@db-ip.com			
IPinfo	support@ipinfo.io			
Digital Element (NetAcuity)	ip-data@digitalenvoy.net			
NeuStar (now TransUnion)	ipintel@support.neustar			
ipapi.co	privacy@ipapi.co			
ipgeolocation.io	support@ipgeolocation.io			
BigDataCloud	support@bigdatacloud.com			
ipregistry	corrections@ipregistry.co			

Send the block in CIDR notation, the country and, if you want one, the city.

3. Check later

☐ After a few days, look the address up on each provider's own lookup page and write the date above. Ask again where nothing has changed.

☐ A site still gets it wrong? Contact that site and ask it to refresh its copy of the database.
